Objective

As a B.Tech student with expertise in web development and coding, I excel in creating responsive, userfriendly web applications with seamless frontend and backend integration. Passionate about technology, I stay updated with industry trends to deliver innovative solutions. Dedicated to continuous learning, I aim to contribute meaningfully to an organization's growth through creativity, collaboration, and commitment.

Education

Degree	Institution	Duration
B.Tech in Computer Science	Parul university, Gujarat	2021 – 2025(may)
Intermediate	Resonance, Khammam.	2019 – 2021

Projects

E-commerce Website (Django, React)   *Access Website* ↗

- Developed a full-stack e-commerce platform using Django (REST API) and React, delivering a responsive and user-friendly experience. Implemented core features such as user authentication, product listing, cart management, order tracking, and secure payment integration. Optimized database performance with Django ORM and ensured secure user sessions using JWT authentication.
- Built a dynamic React frontend with real-time updates and smooth API communication, ensuring data accuracy and system efficiency. Followed best coding practices and a modular architecture to enhance scalability, maintainability, and future feature expansion.

Blog Website (Django, React)   *Access Website* ↗

- Developed a full-stack blog website using Django (REST API) and React, offering a responsive and user-friendly interface. Implemented key features including user authentication, post creation, editing, deletion, and comment management. Optimized database performance using Django ORM and secured user sessions with JWT authentication.
- Built a dynamic React frontend for seamless content display and real-time updates. Ensured efficient API communication between the frontend and backend, maintaining data accuracy and system efficiency. Followed best coding practices and a scalable architecture for easier maintenance and future feature enhancements.

Technical Skills

- **Programming:** Javascript, Python
- **Database:** SQL
- **Frontend Development:** HTML, CSS, JavaScript, React
- **Backend Development:** Django
- **Tools:** Git, Postman, Vercel

Achievements

- Participated in Web-o-stav
- Participated in Codewars

Soft Skills

- Quick learning
- Logical thinking
- Interested in solving real-world problems
